

Hands Free...Fuller-Kinyon® Lubrication!

Take advantage of another great FLSmidth special promotion that will continuously protect and greatly improve the availability of your 3 piece M-Pumps.

For a limited time, FLSmidth is offering a valuable promotional discount on our new PLC based Fuller-Kinyon Pump Auto-Lube System.

The Promotion:

When you purchase the FK Auto-Lube System together with new discharge and drive end bearing housing assemblies (HOT SWAPS), you will receive a 50% discount off the list price of the Auto-Lube. FLSmidth will also provide on-site start-up assistance for the FK Auto-Lube at no charge. This equates to greater than a \$10,000 value.

This special offer is available for all 3-piece M Pumps.

Pricing:

<u>Fuller-Kinyon Pump Size</u>	<u>Drive End Bearing Assembly</u>	<u>Discharge End Bearing Assembly</u>	<u>**FLS Auto Lube System</u>	<u>Final Price</u>
150M	\$10,234	\$8,910.	**\$9,600.	\$28,744
200M	\$12,109.	\$10,732.	**\$9,600.	\$32,441
250M	\$11,880.	\$10,796.	**\$9,600.	\$32,276
300M	\$16,551.	\$14,776.	**\$9,600.	\$40,927
350M	\$20,076.	\$17,210.	**\$9,600.	\$46,886

**50% Discount Price (Auto-Lube list price is \$19,200)

Program Conditions:

- This special offer is only valid with the purchase of new discharge and drive end bearing housing assemblies. Late design bearing housing assemblies are required for the Auto-Lube operation due to the tapped holes in the housings used for the system's bearing RTDs.
- We require that the Auto-Lube system and the new bearing assemblies be installed concurrently on the FK Pump within 120 days of receiving shipment.
- FLS-PT will provide 1 day on-site start-up assistance and training service at no charge.
- There is no limitation on the quantity of Auto-Lube promotions that can be purchased.
- This offer will expire 12/31/19.
- FK Auto-Lube can still be purchased without the bearing housing assemblies for \$19,200.

Formal Quotes and Ordering:

Please call or email your FLS associate, your local FLS Rep, or call FLS-PT at 1-800-795-6825.

Please provide the following information when ordering:

- FK Pump serial number that the AutoLube and bearing housings will be installed
- Auto-Lube assembly numbers: (PDB 8060065 - 150M, 200M, & 250M)
(PDB 8060056 - 300M & 350M)

FK Auto-Lube Advantages:

Eliminates daily lubrication with a "Hands-Free" approach.

The FK pump Auto-Lube lubrication system is designed to deliver the precise amount of lubrication to each lube point to eliminate over or under lubrication failures.

Bearings, shaft seals, and blowout lever shaft are lubricated on an adjusted hourly interval.

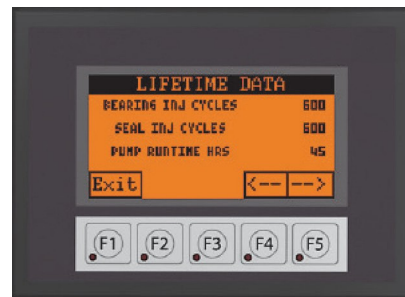

Because of the 2 liter capacity of grease, the FK Auto-Lube system can deliver up to 4 months of continuous lubrication between refills while continually monitoring bearing temperatures to prevent failures from improper lubrication.

Continuously monitors bearing temperatures, lube point injection, and lubrication reservoir level with alarm functions that alerts personnel of pending failures.

The FK Pump Auto-Lube system can be started either locally from its panel, or remotely using hardwired signals.
